

Sparrow Cloud

Fly High Above the Sky with Sparrow Cloud!

Sparrow Cloud provides application security testing as a cloud-based SaaS service. With Sparrow Cloud, users can perform both static and dynamic analysis to identify and manage security vulnerabilities from source code and web application.

Static Analysis

Sparrow Cloud uses checkers that support major global compliance guides to check security vulnerabilities and quality issues in source code developed with Java, JSP, JavaScript, PHP, C#, ASP(.NET), Objective C, Python, HTML, SQL, XML.

Dynamic Analysis

Sparrow Cloud collects sub-paths of web application URLs by replaying events, and performing analysis on a wide range of web applications such as basic HTTP messages and web pages using Ajax.

SaaS Cloud

Sparrow Cloud is a SaaS cloud service using web browsers. Thus, it enables users to enjoy static analysis of source code and dynamic analysis of web applications at anytime online.

Manageability

With Sparrow Cloud, multiple users can share, manage, and report the results of application security testing on the basis of an application project.
